Harshal John Robson

Kochi, India +91 7510304776 harshaljohnrobson@gmail.com LinkedIn Portfolio

PROFESSIONAL SUMMARY

Results-driven Data Analytics Associate with an MSc in Business Analytics and Decision Science and hands-on experience in advanced data gathering, SQL, Power BI, and predictive modeling. Proven track record supporting stakeholder requirements, managing large enterprise datasets, driving continuous process improvement, and aligning data practices with operational KPI frameworks. Adept at cross-functional virtual collaboration, mastering ambiguity, and delivering actionable insights for procurement and business optimization.

PROFESSIONAL EXPERIENCE

Business Analyst August 2026 – Present

Holy Faith Finance Pvt Ltd | Kochi, India

- Supported build phase of strategic analytics use cases, gathering detailed data, conducting market research, and preparing insight reporting for key stakeholders.
- Evaluated and modeled revenue streams and monetization frameworks, optimizing financial viability and data integration across new business lines.
- Drove change management and operational implementation by training cross-functional team members on deployed software solutions, reporting dashboards, and standardized workflows to ensure high adoption rates.

Freelance AI Trainer Nov 2024 – May 2025

Outlier Remote

- Evaluated, structured, and refined 50+ complex AI training prompts and model outputs spanning analytical, verbal, and multi-modal datasets to elevate LLM accuracy and reasoning capabilities.
- Executed 30+ high-precision data annotation and Reinforcement Learning from Human Feedback (RLHF) initiatives 100% on schedule under tight operational SLAs.
- Crafted rigorous benchmark test cases and provided detailed qualitative justifications for model evaluations, adhering strictly to compliance guidelines.

Market Research Analyst Intern April 2023 – Jun 2023

Vee Tee Engineers | Kochi, India

- Conducted comprehensive market research on real estate trends, competitor metrics, and pricing data to support strategic site-selection and investment decisions.
- Analyzed extensive datasets using MS Excel (pivot tables, trend analysis) to identify demand patterns and generate routine reporting data.

EDUCATION

MSc, Business Analytics and Decision Science (Grade: 2:1) September 2023 – September 2024

University of Leeds | Leeds, United Kingdom

Focused on advanced predictive analytics, operations research, information management, and data-driven decision-making frameworks.

BSc, Physics (Grade: Distinction) June 2020 – May 2023

ST Berchmans College | Kottayam, India

Strong analytical foundation with rigorous mathematical modeling and statistical problem-solving competencies.

CORE TECHNICAL & PROFESSIONAL SKILLS

Data & Analytics Management: Advanced Excel, SQL, Power BI, Python (Pandas, NumPy), KPI tracking, Cycle Times & SLA optimization.

Project & Stakeholder Mgmt: Cross-functional leadership, virtual team collaboration, timeline tracking, objective documentation.

Procurement & Systems Tech: ERP familiarity, spend analysis tools, data visualization, master data cleansing & governance.

Change Management: Process improvement, continuous improvement methodologies, navigating ambiguity, initiative execution.

KEY PROJECTS & ANALYTICS USE CASES

Lead Targeting & Predictive Analytics Pipeline

Dataset Scale: 45,211 rows

Tools: Python, XGBoost, Plotly

- Supported build phase of a machine learning classification pipeline to target high-probability leads for bank term deposit subscriptions.
- Calibrated predictive models to a 0.70 confidence threshold, isolating premium leads, reducing agent call volume by 91.2%, and driving a net financial lift of +$8,775.
- Designed interactive Streamlit dashboards for stakeholder visualization of campaign KPIs and performance metrics.

FinTech Fraud Velocity & Master Data Engine

Dataset Scale: 6.3M+ Transactions

Tools: Advanced SQL

- Developed a production-grade SQL fraud detection engine to identify behavioral anomalies, velocity surges, and complete fund liquidation across large-scale transactional databases.
- Implemented sliding window functions, complex self-joins, and heuristic logic to cleanse master data and uncover coordinated mule accounts, ensuring strict adherence to risk policies.

Aspect-Based Sentiment Analysis & Reporting Dashboard

App Review Analytics

Tools: Python, Hugging Face Transformers, Streamlit

- Gathered and analyzed large unstructured app review datasets from the Play Store using Hugging Face transformers to perform aspect-based sentiment analysis.
- Published actionable insights and automated reporting dashboards via Streamlit to support cross-functional continuous improvement and product optimization efforts.

CERTIFICATIONS

- **IBM Data Analyst Certification:** Certified proficiency in data analysis pipelines, SQL querying, data cleaning, and visualization tools.
- **Microsoft Office Specialist Certification & DP-900:** Validated expertise in advanced data processing, database structures, and Azure cloud data foundations.
